
BEEINFOTECH PH, INC.

INTERNET DATACENTER &
OTHER IT SOLUTIONS

Who We Are

Corporate Background

Established in 2020, Bee Information Technology PH Inc. (Beeinfotech PH) provides partner neutral & telco grade datacenter facilities and other IT solutions. Led by its President & CEO, industry veteran Reynaldo Huergas, the team is backed by IT professionals in networks, technology and services.

Beeinfotech PH's inaugural datacenter, aptly named THE HIVE, offers 2,800+ racks and is located in Pasig City, NCR. It features the Philippines' first Uptime Institute™ Tier III certified facility as well as ISO, PCI DSS, LEED and other global standards. The facility also provides other services like Business Continuity seats, SOC/NOC rooms, multi-cloud servers, DDoS mitigation and other IT security applications, as well as other IT hardware and software solutions.

Moving forward, Beeinfotech PH continues its mission of providing data management expertise to business communities with cutting-edge technologies, supported by the largest network of data centers in the region. Utilizing global technologies and making them available locally, Beeinfotech PH's vision is to be the data center services provider of choice, enabling the digital transformation of the markets it serves.

What We Do

Business Enabler

PH's first telco neutral & partner agnostic internet datacenter

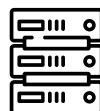

Green Initiative

Designed to reduce carbon footprint & reduce power needs

Innovation

Utilizes global technologies but with a local footprint

More than a Datacenter

Connectivity solutions, network security, SOC, NOC, DR site for businesses

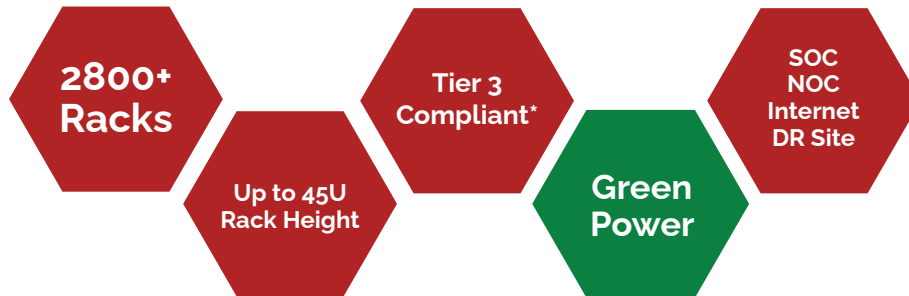

Digital Transformation

Beeinfotech PH is driven to accelerate digital transformation in PH

The HIVE

DATACENTER

Design & Infra

Beeinfotech PH's Datacenters are developed using an Open Design concept, this ensures all client specifications can and will be met without the need to significantly alter the whole structure. The Elastic Floor concept supports multi purpose configuration of rackspace and other business requirements. Also, special enclosures, zoning or caging are available for multiple rack deployments. In terms of cooling and power, all equipment offer the latest datacenter tech to increase overall reliability and to conform to the reduced carbon footprint initiative.

Network

Telco neutral & partner agnostic, Beeinfotech PH Datacenters enable global cross interconnect of all relevant telcos & ISPs. With footprint in across Asia and the world, all connectivity needs are supported. DDoS and other digital attack mitigation systems are built in to ensure optimal linkages.

Security & Compliance

With 7 plus layers of security, the Beeinfotech PH Datacenter facilities are ready with the most comprehensive intrusion protection capabilities. In terms of global adherence to global standards, Beeinfotech PH datacenters have ongoing ISO, UPTIME, PCI and other certification entities.

Datacenter Specifications

- Initial 2800+ racks with up to 45U rack height
- 1200mm x 600mm rack dimensions
- 5KVA power per rack (initial 3KVA)
- Uptime Institute Certification Tier III
- ISO, PCI-DSS DSS & LEED Certification
- Open Design concept, flexibility to suit client requirements
- Fire-suppression system
- Minimum N+1 configuration for electrical & mechanical
- Sesimic zone 4 compliant
- 7-Layers of Security
- Hot and Cold Aisle thru Chilled Water Cooling System
- Modular Scalable, Uninterrupted Power Supply (UPS)
- Redundant Energy Center, access to Meralco Grid with 50MW capacity
- Remote Hands
- 1000 available Business Continuity (BC/DR) seats
